

What's Accepted

Electronics accepted at our depot locations

Display Devices

Televisions and monitors, including various technologies such as Cathode Ray Tube (CRT), All-in-one, flat panel (LCD, LED and plasma) and rear projection.

Non-Cellular Telephones and Answering Machines

Includes corded and cordless telephones, as well as telephone answering machines.

Home Audio/Video Systems

Includes VCR, DVD and CD players, digital cable and satellite equipment, speakers, amplifiers, receivers, data projectors and similar audio/video systems.

Desktop Computers

Desktop computers (including those acting as servers) and all bundled keyboards, mice, cables and internal components.

Portable Computers

Includes portable computers such as laptops, netbooks, notebooks, tablets and internal components.

Computer Accessories

Includes both wired and wireless manual input devices such as keyboards, mice and trackballs.

Personal or Portable Audio/Video Systems

Includes docking speakers, portable stereos, portable CD players, portable audio recorders, tape/radio players, headphones, digital media (MP3) players, voice recorders, digital cameras and video cameras.

Home Theatre In-A-Box

Includes pre-packaged disc player/speaker/amplifier systems for use with video or television display to create a home theatre experience.

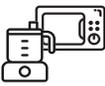

Vehicle Audio/Video Systems (aftermarket)

Includes amplifiers, equalizers, speakers and audio/video components.

Cellular Devices and Pagers

Cellular phones, including those offering camera, video recording and/or audio functions; smartphones (cell-enabled); cell-enabled PDAs utilizing touch-screen technology; cell-enabled handheld devices.

Kitchen Countertop Appliances & Microwaves

Blenders, mixers, food processors, juice extractors, coffee grinders, food dehydrators, fondue fountains, vacuum sealers, toasters, toaster ovens, fryers, hot plates, bread makers, induction cookers, pressure cookers, waffle irons, coffee makers, kettles, espresso makers and countertop microwave ovens.

Time & Weight Measurement Devices

Alarm clocks, wall clocks, timers, bathroom scales, food scales, luggage scales.

Floor Cleaning Devices

Floor vacuums, carpet cleaners, robotic vacuums, handheld vacuums and stick vacuums.

Garment Care Appliances

Irons and steamers, shavers for clothes, portable heated towel racks with plug.

Air Treatment and Personal Care Appliances

Portable fans, heaters, aromatherapy diffusers with a cord, humidifiers, hair dryers, electric toothbrushes and shavers.

Desktop Printers, Fax Machines and Copiers

Printers designed to reside on a work surface, including laser and LED, inkjet, dot matrix, thermal, dye sublimation and "multi-function" copy, scan, fax and print devices. Stand-alone desktop scanners and fax machines are also included in the category.

When you bring your old, unusable electronic and electrical products to a Recycle Yukon Electronics authorized depot, you're helping to:

- Keep old electronic and electrical products out of landfills.
- Prevent e-waste from being illegally exported or handled by irresponsible recyclers.
- Recover and recycle resources that can be put back into the manufacturing supply chain.

About Recycle Yukon Electronics

As a recognized industry-led not-for-profit organization, Recycle Yukon Electronics provides an environmental compliance program for manufacturers, distributors and retailers of electronics. Recycle Yukon Electronics is responsible for implementing and operating, on behalf of their producers, a safe and secure program for the recovery and reclamation of end-of-life electronic products.

Who are we?

Recycle Yukon Electronics is your go-to resource for electronics recycling. We're here to help you recycle your end-of-life electronic products and provide educational resources.

Recycle Yukon Electronics safely diverts end-of-life electronics from landfills and illegal export every year.

Q: What is Recycle Yukon Electronics?

A: Recycle Yukon Electronics is a not-for-profit industry-led organization that operates a government-approved end-of-life electronic and electrical product recycling program throughout the territory. Residents and businesses can drop off their unwanted electronics and electrical products free of charge for safe, secure and responsible recycling at a Recycle Yukon Electronics depot.

Q: Isn't it important to reuse before recycling?

A: Absolutely. The Recycle Yukon Electronics program is designed to manage end-of-life electronic and electrical products that have exhausted their reuse potential. If your electronic/electrical items are not at the end of their useful life, you are encouraged to explore reuse opportunities including donating them to family members, friends or authorized reuse organizations like Computers for Schools Yukon.

Q: How does Recycle Yukon Electronics ensure that electronics are recycled responsibly?

A: Recycle Yukon Electronics is committed to recycling end-of-life electronic products collected through our network of depot locations in a responsible manner. Recycle Yukon Electronics only works with recyclers who have been verified under the national Electronics Recycling Standard (ERS), which was designed by the electronics industry to ensure that end-of-life electronics are managed in a safe and environmentally-sound manner. This means that all Recycle Yukon Electronics verified recyclers must be actively processing material that is entrusted to them by Recycle Yukon Electronics. This ensures that recyclers are maintaining appropriate environmental, health and safety controls and are properly handling all materials.

Q: How do I know my personal information will not be seen or stolen?

A: Consumers and businesses are responsible for ensuring that all personal data is removed from their electronic devices, prior to bringing them to one of our depots. If you are unsure how to do this, contact the manufacturer for more information. While Recycle Yukon Electronics requires that all of our recyclers protect data on end-of-life electronics from unauthorized access or theft, it is your obligation to protect your personal information. Recycle Yukon Electronics does not accept liability for data or any other digital content that is left on electronic products collected at our depot locations.

Q: How is the program funded?

A: Recycle Yukon Electronics is funded through a surcharge applied on the sale of all new designated electronic and electrical products. It's not a tax, nor is it a refundable deposit. The surcharge is based on the cost to recycle end-of-life electronic and electrical products. All program revenue is used for the collection, transportation and responsible recycling of end-of-life electronics and electrical products as well as program administration.

Q: Where will my recycled electronics go?

A: Recycle Yukon Electronics manages end-of-life electronics and electrical products according to the highest environmental standards at every stage of the recycling process. Once collected and sorted, items are sent to a Recycle Yukon Electronics approved recycling facility for dismantling, and proper downstream management. All other materials are separated into different streams to recover metals, plastics, glass and natural resources so they can be processed into new products.
